## Profile

Information Science & Engineering student with hands-on experience in Java, Python, REST APIs, backend development, AI/ML, cloud, and DevOps. Experienced in developing and troubleshooting software solutions using Spring Boot, FastAPI, Flask, Node.js, Docker, Jenkins, and AWS. Skilled in DSA, OOP, SQL, DBMS, and Linux, with a collaborative mindset and interest in learning new technologies.

## Education

|                                                                                                       |                                                    |

| <b>Vivekananda Pre-University College</b><br><i>Pre-University (PCMB)</i>                             | 2021 – 2023<br><i>Puttur, Dakshina Kannada</i>     |

## Technical Skills

**Languages:** Java, Python, JavaScript, C

**Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS

**Systems & Tools:** Linux, Shell Scripting, Git, GitHub, Postman

**Cloud & DevOps:** AWS (EC2, S3, IAM, VPC, CloudFront), Terraform, Jenkins, Docker, CI/CD

**Databases:** SQL, MongoDB, SQLite

**Technologies:** React.js, Node.js, Express.js, FastAPI, Flask, HTML, CSS

## Projects

**Autonomous CI/CD Auto-Fix System** | Python, FastAPI, LangChain, React.js, Docker | 

- Developed an AI-powered system to automatically detect and resolve CI/CD pipeline failures using Python and FastAPI.
- Built REST APIs and WebSocket integration for real-time pipeline monitoring and debugging.
- Automated Git workflows and containerized the application using Docker.

**Veritas Claims Analytics - Medical Data Standardisation Pipeline** | Python, Flask, SQLite | 

- Built an ETL pipeline to ingest, standardise, and validate JSON medical reports from 500+ clinics.
- Implemented content-based duplicate detection and idempotent database loading using Python and SQLite.
- Developed a Flask dashboard displaying pipeline stats, flagged records, and per-clinic quality metrics.

**SPECTRA – AI-Powered Digital Forensics System** | Python, Java, Spring Boot, Flask, React, MongoDB | 

- Developed an AI-powered digital forensics system to analyze files, event logs, browser history, and network traffic for threat detection and investigation.
- Built a hybrid threat analysis engine using Random Forest, Isolation Forest, and rule-based scoring for threat and anomaly detection.
- Built REST APIs for evidence ingestion, analysis, timeline reconstruction, and forensic reporting.

## Certifications

- Programming in Java – NPTEL
- Introduction to MongoDB for Students – MongoDB
- AWS Cloud Practitioner Essentials – Amazon Web Services

## Achievements

- Participated in **RIFT 2026 Hackathon** at PW Institute of Innovation, Bangalore – built an Autonomous CI/CD Auto-Fix System on the AI/ML & DevOps Automation track.
- **Published Research Paper:** “Plug-and-Play WhatsApp Communication Engine”. Published in IEEE Xplore Digital Library (Doc. ID: 11483458).

## Positions of Responsibility

- **Student Coordinator – Blind Buddies, Aakriti 2026** March 2026  
Managed logistics and volunteers for an inclusive event supporting visually impaired participants.
